

Pipeline Protection Project Community Meeting

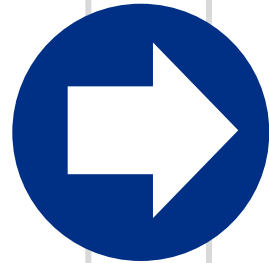

December 4, 2023

EPWater's Mission:

To provide our customers a sustainable water supply and the highest quality water services to enhance the vitality of El Paso.

Strategic Objectives:

Improve
Infrastructure

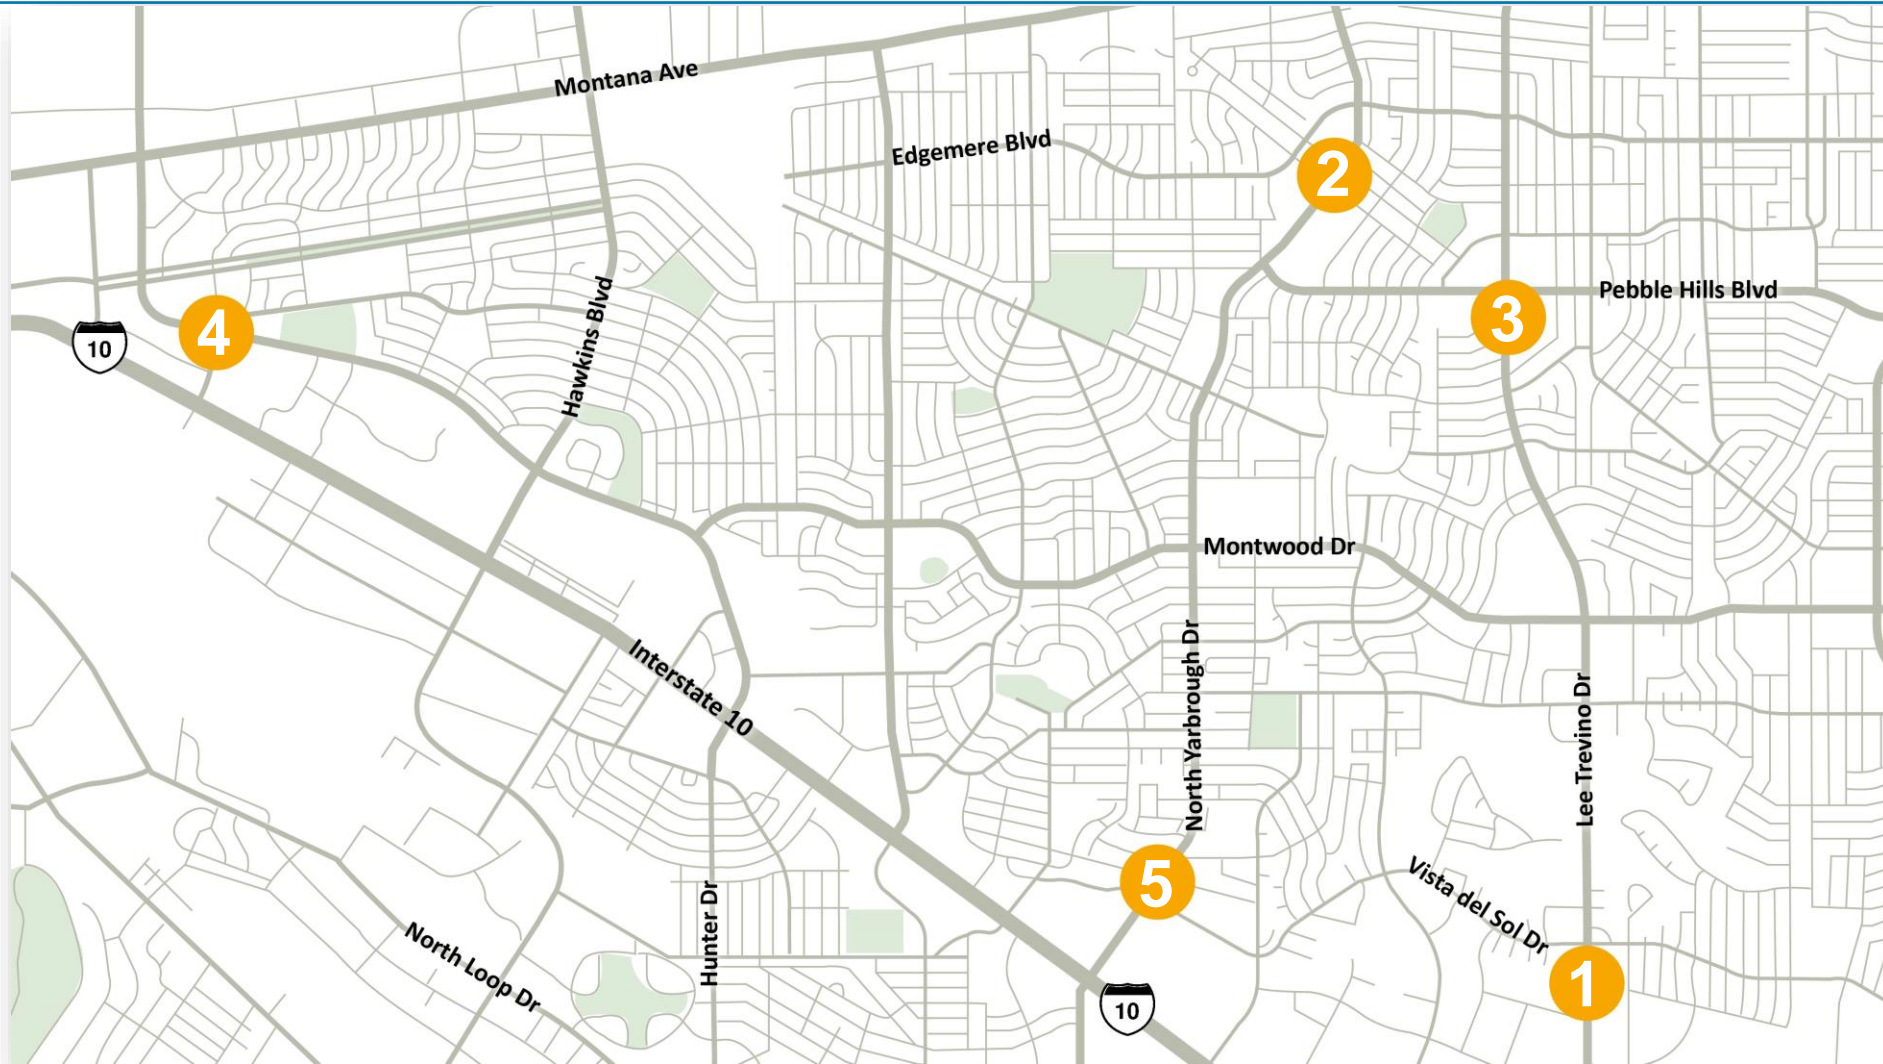

Purpose:

Proactively replace critical pipeline infrastructure prone to corrosion at gas and oil pipelines crossing with corrosion resistant pipes.

Project Overview

- Through the end of next year, El Paso Water will replace portions of water mains that cross major natural gas and petroleum pipelines.
- This project will aim to minimize major water main breaks.
- Natural gas and petroleum pipelines are protected with cathodic protection systems (low level electrical current) that may corrode surrounding metallic pipelines.
- El Paso Water will be replacing existing metal-based pipelines with a corrosion resistant pipe at crossings with natural gas and petroleum pipelines

Project Location

Approximate Timeline of Construction

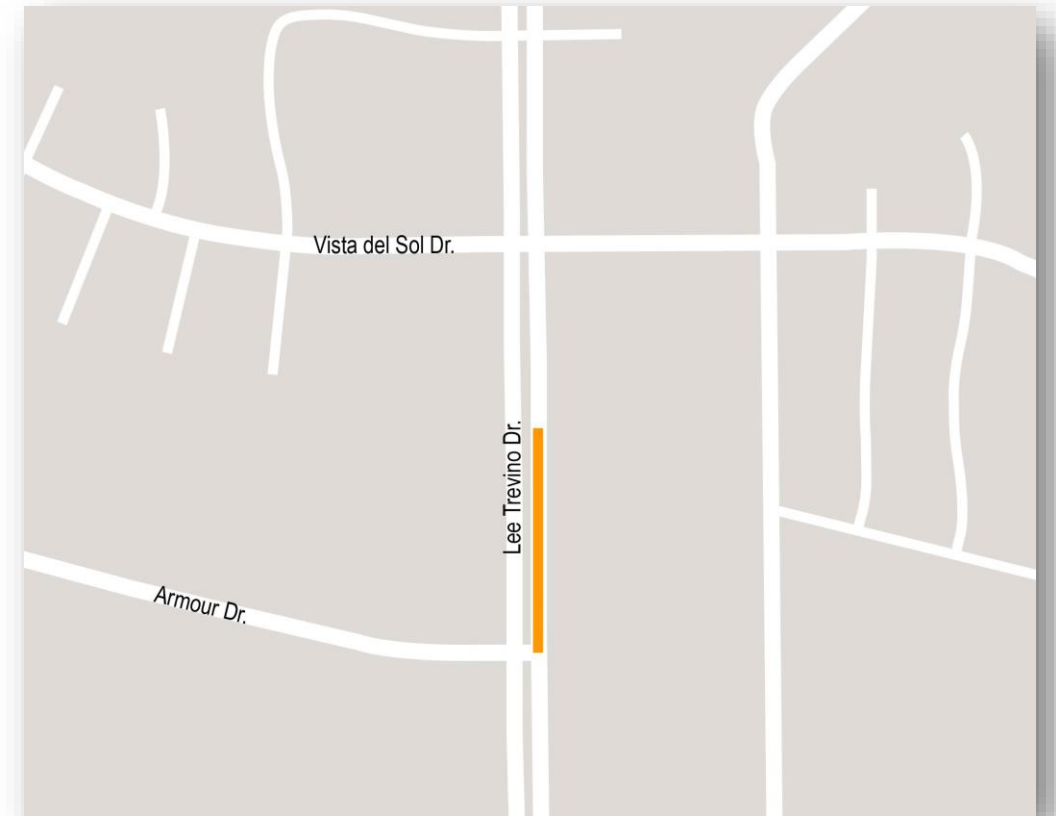

Subject to change based upon weather and field conditions.

Lee Trevino Drive at Vista del Sol

Completed September 2023

Approximately 450 feet of one water main and approximately 100 feet of another water main running under the northbound lanes of Lee Trevino between Armour and Vista del Sol was replaced.

Lee Trevino Drive at Vista del Sol

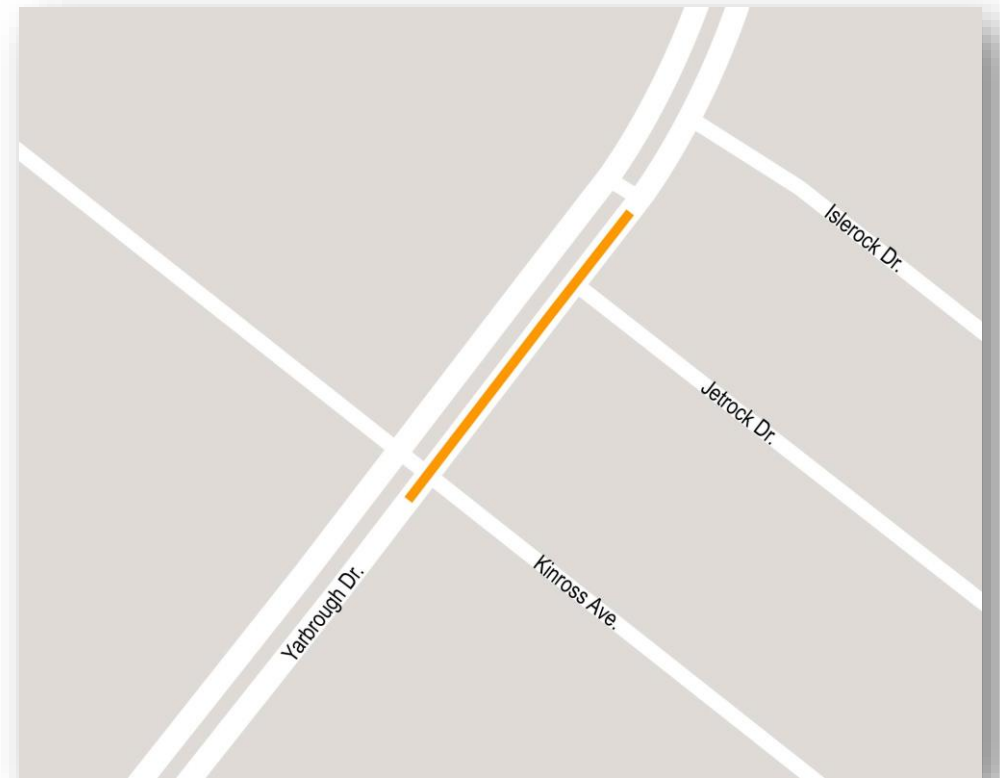

Yarbrough Drive at Kinross

August 2023 – December 2023

Approximately 450 feet of large diameter water main running under the northbound lanes of Yarbrough and between Kinross and Jetrock will be replaced.

Approximately 180 feet of smaller diameter water main will be installed under the southbound lanes of Yarborough starting at Kinross going North

Yarbrough Drive at Kinross

Lee Trevino Drive at Pebble Hills

January 2024 – April 2024

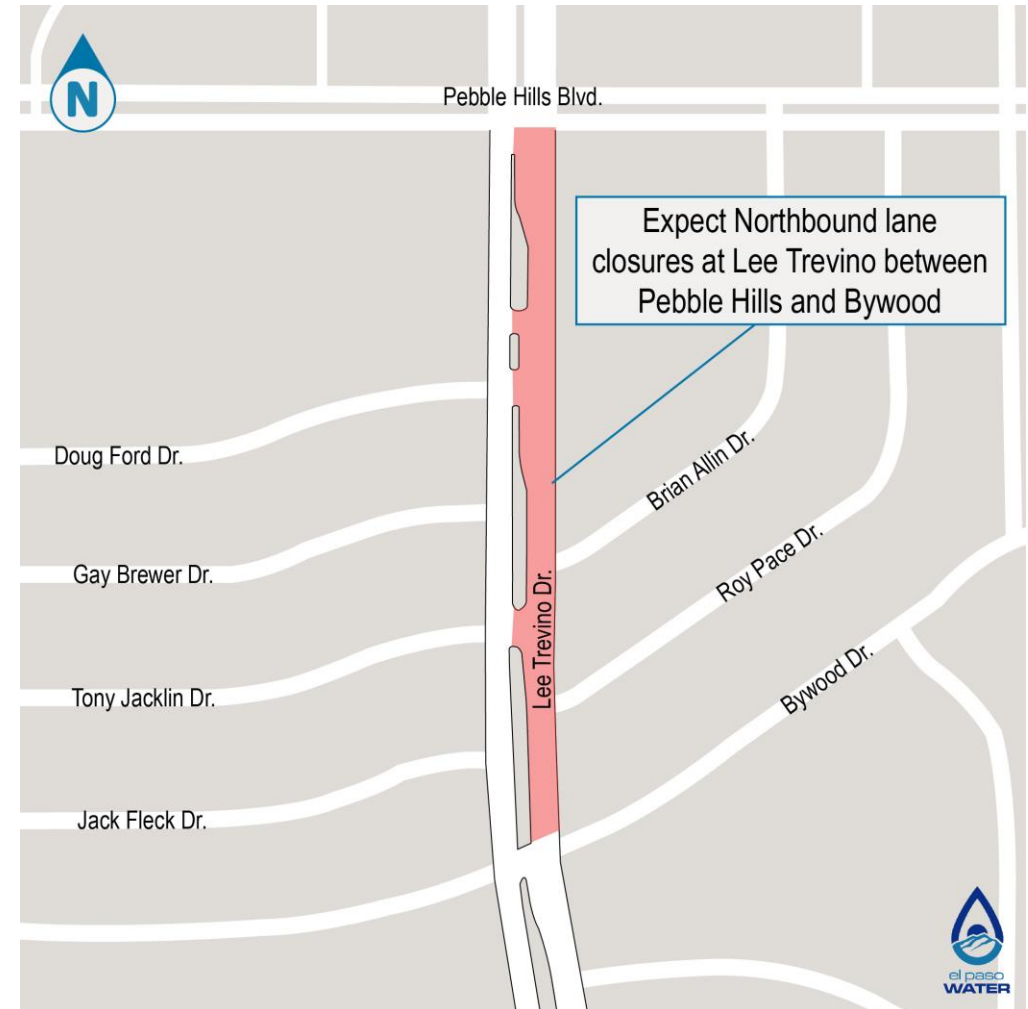

Approximately 400 feet of one water main running under the northbound lanes of Lee Trevino will be replaced.

At least one northbound lane anticipated to be open at all times.

Motorists should expect changing traffic conditions when traveling in the work zone.

Median crossings at Tony Jacklin, Doug Ford, and Bywood will be temporary closed at varying intervals.

Southbound traffic is not anticipated to be impacted.

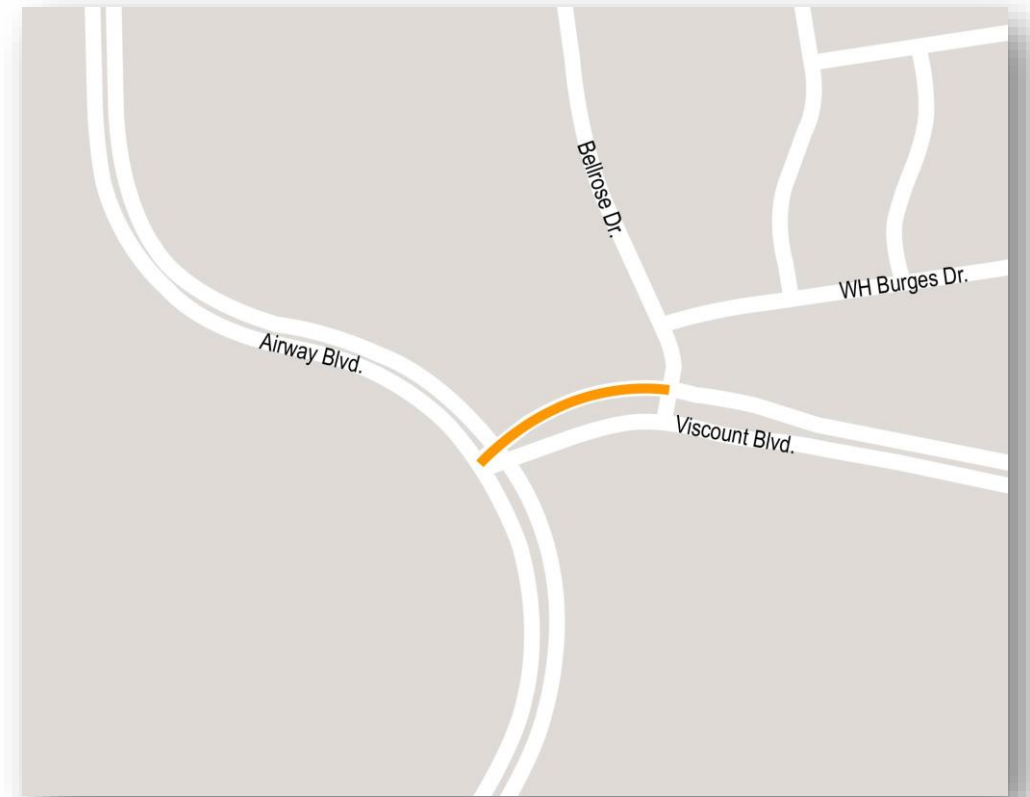

Viscount Boulevard at Airway

January 2024 – April 2024

Approximately 450 feet of two water mains running under the westbound lanes of Viscount west of Belrose and crossing under the northbound lanes of Airway will be replaced.

Public meeting scheduled for Monday, December 11, at Burges High School Library from 5:30 p.m. – 6:30 p.m.

Yarbrough Drive at Vista del Sol

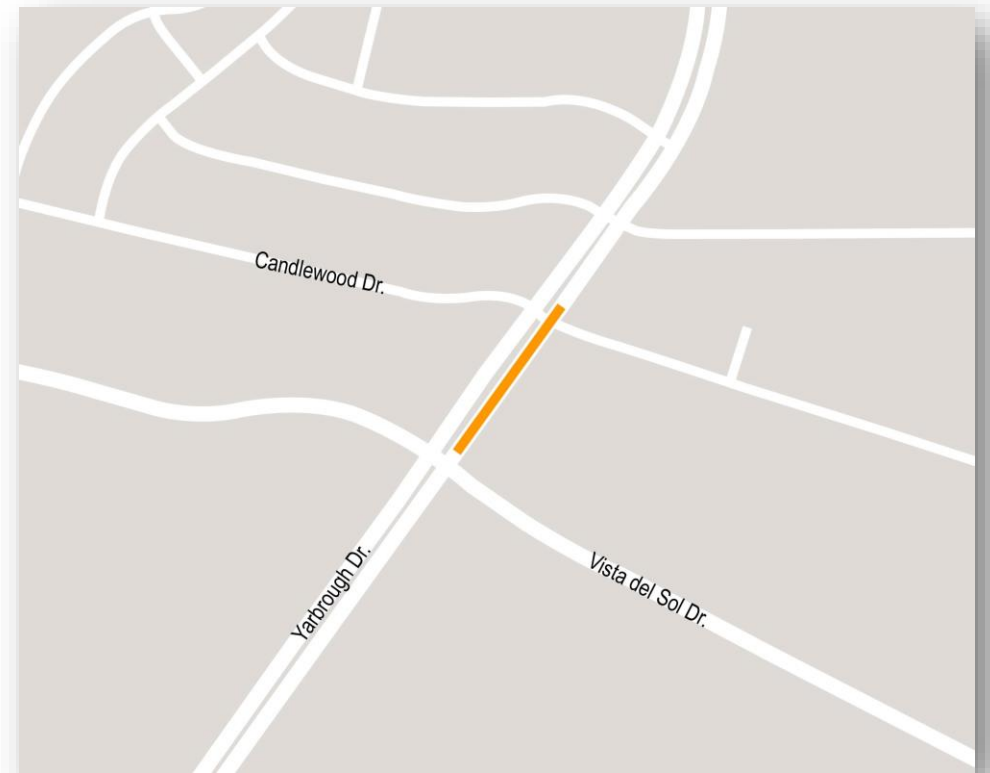

April 2024 – November 2024

(Start date subject to change)

Approximately 500 feet of a large diameter water main running under the northbound lanes of Yarborough will be replaced and 500 feet of small diameter water main will be installed under the northbound lanes of Yarborough.

Approximately 550 ft of a large diameter water main will be replaced under the south bound lanes of Yarborough.

Public meeting and other notification ahead of construction

Mitigating Impacts

- Expect changing traffic patterns during each phase of construction.
- Use caution, reduce speed, pay attention to signs, barrels, and barricades.
- Minimal work will be allowed to take place during the winter holiday season.
- Water service interruptions will be kept at a minimum. Advanced notice will be provided.
