The minimum and commodity charge will be set through the next February billing cycle.

*Average Winter Consumption (AWC) is the average amount of water used during the most recent December, January, and February billing periods.

SECTION II

Charges for services less than the normal 30-day reading cycle shall be calculated in the same manner as a full reading cycle.

SECTION III

Sewer services to facilities where all or part of the water supply is obtained from other than the City water system shall be charged on the basis of the actual sewage volume as estimated by the utility or as measured by a meter installed at the customer's expense, except as provided herein for certain residential properties. The charge for such sewer service shall be \$21.08 per month, plus \$1.91 per hundred cubic feet of the total actual or estimated sewage volume for all users.

SECTION IV

Where the sewer service charge is based on water consumption and the use of the water is such that a considerable portion thereof is not returned to the sanitary sewer system, the user may, at his option, install a meter for the purpose of measuring such water that does not return to the sewer or a meter to measure the amount of sewage actually entering the system, and the monthly sewer charges shall be based on the difference between the two water meters or on the reading of the sewer meter, whichever is applicable. Meter installations as described herein shall be made at the user's expense. The charge for sewer service based on actual volume of sewage shall be \$24.27 per month, plus a fixed monthly charge based on meter size and \$1.91 per hundred cubic feet of the total measured sewage volume.

SECTION V

Sewer charges are based on the "normal" quality (or strength) of sewage. A surcharge shall be added for strengths exceeding the normal limits based upon analysis of samples taken by the Utility under provisions of the Rules and Regulations, and upon the quantities of sewage determined by the same methods used to calculate the regular sewage charge. The surcharge shall be 15.0 cents for each pound of BOD in excess of 300 parts per million (ppm), plus 14.0 cents for each pound of suspended solids in excess of 300 ppm.

Management shall review its cost structure annually and shall make such adjustments in the surcharges as may be necessary to properly reflect the cost to the Utility of treating over strength wastes or as required by the Environmental Protection Agency.

SECTION VI

Any person who discharges into the sanitary sewer system and exceeds the normal quality or strength without paying the surcharge set forth under Section V above, shall be subject to the enforcement action provided in Section 15.12.120-2 of the El Paso Municipal Code and shall be subject to any additional enforcement action, as set forth in the Public Service Board's Rules and Regulations and the El Paso Municipal Code, as they may now read or may hereinafter be amended, including the discontinuance of service and a suit for collection of the surcharge.

Services will be scheduled for disconnection the following work day unless the billed amount has been paid.

SECTION IX

All of the aforementioned charges apply for sewer service to property within the city limits of El Paso. Where the sewer connection provides service to property outside the city limits of El Paso, the charge for such service shall be 1.15 times the rates for similar service to customers whose property is inside the city limits.
