

El Paso Water
Architect/Engineer Professional Services
Statement of Pre-Qualifications

Architectural, Engineering, Geology, Environmental, Materials Testing/Forensics, or Surveying firms that desire to work for El Paso Water (EPWater) must submit a Statement of Pre-qualification to AESelections@epwater.org. Firms are encouraged to update their Statement of Pre-qualifications when owners, project managers, or key employees change. For example, when a project manager resigns from a firm or when a firm hires a new project manager or subject matter expert, the firm should promptly amend its Statement of Pre-qualifications so that EPWater knows of the change in the firm’s capacity to perform work. EPWater may use this Statement of Pre-Qualifications at its discretion for selection of firms for small professional services projects under \$100,000.
